

## DESOLDERING TOOLS

**ST-140**

**ST-140-TIP**

Replacement desoldering tip

### FULL SIZE

Full sized manually operated professional desoldering tool - a must for the serious electronics technician. Offers superior vacuum power and reliability. Just load, lock, and activate trigger to produce a vacuum to draw molten solder into the chamber.

**ST-130**

### COMPACT

Compact manually operated desoldering tool - ideal for the hobbyist. Just load, lock, and activate trigger to produce a vacuum to draw molten solder into the chamber.

## SOLDER IRON TIP CLEANER WITH STAND

**SR-460**

**SR-459**

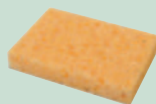

Replacement Solder Iron Tip Cleaner

A revolutionary new method for tip cleaning. This waterless system uses fine brass shavings to remove excess solder. Oxides and other contaminants are safely cleaned from any soldering tip without damaging the tip plating. Prevents temperature drops as found in conventional sponge & water set ups.

## SOLDERING IRON HOLDER

**SR-240**

**SR-240-SPONGE**

Replacement Soldering Stand Sponge

Holds most soldering irons (SR-1020, SR-1100, SR-1530) and comes complete with sponge for easy tip cleaning.

## FUME EXTRACTOR

The SR-900 Fume Extractor is designed to minimize the dangerous smoke by-product produced during the soldering process.

**New!**

Chemical gases are released into the air during soldering and inhalation should be avoided. With the inception of Lead-Free solder and its higher temperature requirements, the inherent flux in the solder has increased to as much as 70%. This has effectively increased the amount of particles, gases and contaminants released during soldering.

A high performance fan efficiently draws these gases through an activated carbon filter. The activated carbon has a surface area of 1250m square/gram and the total weight of the filter is 500 grams/meter square. The dust collection efficiency of the filter is 30% while the carbon filter can absorb up to 30% of its carbon weight in noxious components.

The result is an improved work place by eliminating headaches, nausea and eye irritations often associated with exposure to solder fumes and gases.

### SR-900

SR-900F Replacement Filters, Pkg/3

## SOLDERING TOOL KIT

**SR-300**

4-piece kit of the most useful instruments in electronic soldering. Kit includes a heatsink, knife/brush, scraper/hook, and a fork/pick tool.

## HELPING HANDS

**SH-980**

**SH-982**

with glass magnifier

Portable stand with alligator clips to help hold parts while soldering or assembling. Ball joints on the alligator clips allow for precise set up.
