

10-IN-1 ELECTRONIC LAB

10
Projects

MX-802

Learn and build 10 exciting electronic experiments safely and easily; a great introduction to the world of electronics. Projects include Morse Code, Burglar Alarm and a Radio Kit. No soldering required. For ages 10 and up. Requires one 9V battery.

50-IN-ONE EXPERIMENTER KIT

50
Projects

EP-50

Build 50 different projects without tools or soldering. Excellent for beginners and hobbyists. Requires one 9V battery.

75-IN-ONE EXPERIMENTER KIT

75
Projects

MX-905

Learn the basic principles of electricity/electronics, physics and magnetism. 75 different experiments you can build. Projects include burglar alarm, light dimmer, touch switch and much more. For ages 10 and up. Requires 4 x AA batteries.

130-IN-ONE EXPERIMENTER KIT

130
Projects

MX-906

This kit provides 130 different experiments you can perform. No prior experience in electronics is required. Build your own radio, electronic games and much more. No soldering required. An English manual is included. French manual can be ordered separately. Requires 6 x AA batteries.

200-IN-ONE EXPERIMENTER KIT

200
Projects

MX-907

Learn about electronic parts and circuits by building 200 different projects. By following the simple instructions, you will be able to assemble working electronic projects that are fun and easy to build. Requires 6 x AA batteries.

300-IN-ONE EXPERIMENTER KIT

300
Projects

MX-908

Learn about electronic parts and circuits by building 300 different projects. By following the simple instructions, you will be able to assemble working electronic projects that are fun and easy to build. An English manual is included. French manual can be ordered separately. Requires 6 x AA batteries.

500-IN-ONE EXPERIMENTER KIT

MX-909

With the 500-in-One Electronic Lab, you use the electronic parts located on the board and the auxiliary parts to create up to 500 electronic circuit topics for experimentation and easy learning. Just follow the simple steps in the instruction manual, and before you know it you'll be an electronics whiz!
